

Herewith, **Di ES Smith Bulgaria AD** certifies that the company of **Aquacom Electronics Ltd.**, has performed the following activities in 2014:

- Supply and installation of a system for measuring flow rate and quantity of treated water at the WWTP outlet. The installation location is an open channel with a width of 800 mm and a height of 800 mm. The measurement was performed with "Doppler" technology. The system consists of a controller: model OCM F, bottom ultrasonic sensor to measure the flow rate: model KDA010, compact ultrasonic level gauge for measuring level: model NivuCompact.

Delivery of the equipment was done on time.

All activities related to installation and setup of equipment were made with very good quality and deadlines. We recommend Aquacom Electronics Ltd. as loyal and reliable supplier and contractor of ultrasonic flowmeters for full, partially full pipes and open channels. [view reference](#)
