

"EKOBULHART" Ltd issues the reference herewith to recommend **Aquacom Electronics Ltd.**, UIC 130034671 as a reliable partner in the area of a supply and installation of ultrasonic flowmeters for full, partially full pipes and open channels.

Aquacom Electronics Ltd has performed the following activities in 2016:

Supply and installation of a system for flow rate measurement of a process water in pipeline DN50 and continuous data recording for following up analysis of the results. For the measuring purposes were made additional data recordings of a minimum, maximum, and average water consumption values.

Measuring system is using one-way (with 2 sensors) contactless measurement method "Transit time". The system consists of a controller (transmitter): model NivusSonic CO 100S with Data Logger-Built in SD Card c 2 Gb memory and ultrasonic sensors: model NIS0TT140 for non-contact measurement (Clamp on) of a flow rate.

All activities related to installation and setup of equipment were made with a very good quality and on time. [view reference](#)
